Alex Fernsby

alex.fernsby@example.com +1 555 0100 Rotterdam, Netherlands github.com/afernsby-example

Profile

Data engineer with 7 years of experience building batch and streaming pipelines for retail and logistics companies, strongest in Python, SQL and Apache Airflow. Owns pipelines end to end, from ingestion through dbt warehouse models and data-quality tests to the dashboards that read them. Experienced in mentoring engineers and leading a weekly data-modelling review.

Highlights for this role

- 7 years of experience building batch and streaming pipelines for retail and logistics companies.
- Strongest tools: Python, SQL and Apache Airflow; comfortable owning a pipeline from ingestion to the dashboards that read it.
- Mentors two junior engineers; leads the weekly data-modelling review.

Experience

Senior Data Engineer March 2022 – present
Tidewater Logistics, Rotterdam

- Owns the shipment-events pipeline: 40 million events per day from Kafka into a PostgreSQL and BigQuery warehouse, orchestrated with Apache Airflow.
- Cut the nightly rebuild of the delivery-performance mart from 6 hours to 55 minutes by moving it to incremental dbt models.
- Introduced data-quality tests (Great Expectations) on 30 core tables; failed loads dropped 70 percent over two quarters.
- Mentors two junior engineers; leads the weekly data-modelling review.

Data Engineer June 2018 – February 2022
Marlow Retail Group, Utrecht

- Built the first Airflow deployment at the company and migrated 45 cron jobs onto it.
- Designed a customer-orders star schema in PostgreSQL used by 12 analysts.
- Wrote Python ingestion services for partner price feeds (REST and SFTP), handling about 2 million rows per day.
- Supported the move of the warehouse from on-premise PostgreSQL to BigQuery.

Junior Analyst September 2016 – May 2018
Delft Energy Cooperative, Delft

- Automated monthly consumption reports with Python and SQL, saving the team about 3 days each month.

Education

MSc Computer Science (data systems) 2016
Delft University of Technology **BSc Computer Science** 2014
Delft University of Technology

Skills

Strong: Python, SQL, PostgreSQL, Apache Airflow, dbt, Kafka, BigQuery, Great Expectations, Docker
Working: Terraform, GitHub Actions, Looker, Pandas
Languages: English (fluent), Dutch (native), German (basic)

How the stack fits together

Ingestion (Kafka, Python) Kafka events for the shipment-events pipeline; Python services for REST and SFTP partner price feeds.
Orchestration (Apache Airflow) nightly shipments pipeline; first company Airflow deployment and 45 migrated cron jobs at Marlow Retail Group.
Modelling (dbt, PostgreSQL, BigQuery) incremental dbt models; customer-orders star schema used by 12 analysts; on-premise PostgreSQL to BigQuery migration at Marlow Retail Group.
Quality (Great Expectations) tests on 30 core tables.

Preferences

Senior individual-contributor or tech-lead role on a data platform team. More than 3 days a week on site is a deal-breaker, and on-call only with compensation. Based in Rotterdam, open to hybrid roles in the Netherlands and remote roles across the EU.
